<p><b>Course Overview:</b> This syllabus offers a deep dive into the "Long Middle Ages," tracing the transformation of Europe from the ashes of the Roman Empire to the vibrant cultural awakening of the 12th century. You'll explore the tension between the sword and the cross, examining how Charlemagne built an empire, how the Crusades reshaped the world, and how feudalism structured daily life. Beyond politics, the course highlights the grit of medieval economics—from the rise of guilds to the revival of trade—and the intellectual sparks found in early universities. Finally, we peel back the layers of medieval culture to reveal the artistic triumphs and the often-overlooked roles of women in this foundational era of Western history.</p>
