

## Dissertation

---

### Course Outcome: Dissertation Abstract Submission/Proposal Presentation Seminar

#### 1. Knowledge:

- Understand the importance of a well-defined project title in conveying the essence of the study.
- Analyze the significance of the study in addressing a gap in the existing literature.
- Comprehend the key elements of a brief review of related studies to demonstrate the research background.

#### 2. Comprehension:

- Summarize the research question(s) and objectives to clearly outline the aim of the study.
- Differentiate between a research question, objectives, and hypothesis to align the study design.
- Interpret the significance of the study design and probable analysis methods in achieving the research objectives.

#### 3. Application:

- Apply critical thinking skills to develop a coherent and focused abstract for the dissertation proposal.
- Utilize effective communication strategies to present the research title, significance, and related studies concisely.
- Implement appropriate methodologies for structuring research questions, objectives, and hypothesis in the study design.

#### 4. Analysis:

- Evaluate the coherence and logical flow of the abstract to ensure clarity and consistency in presenting the research proposal.
- Analyze the potential impact of the study design and probable analysis methods on achieving the research objectives.
- Critically assess the alignment between the project title, significance of the study, and research question(s) to ensure a strong proposal framework.

#### 5. Synthesis:

- Synthesize the key components of the abstract submission/proposal presentation into a cohesive and compelling narrative.
- Integrate feedback and recommendations to refine the project title, significance, brief review of related studies, and research question(s).
- Construct a well-structured and persuasive argument for the dissertation proposal, incorporating all essential elements in a coherent manner.

#### 6. Evaluation:

- Assess the effectiveness of the abstract submission/proposal presentation in conveying the research objectives and significance of the study.
- Evaluate the clarity and coherence of the research question(s), objectives, and hypothesis in relation to the study design.
- Provide constructive feedback on peers' presentations to enhance the quality and impact of their dissertation proposals.
