Introduction to Sociology

1. Identify the key concepts and theories related to the nature and scope of sociology within the context of social sciences.
2. Analyze the historical development and emergence of sociology as a discipline, including key figures and events that contributed to its establishment.
3. Evaluate the different theories of socialization and their impact on shaping individual and group behaviors within society.
4. Synthesize the functions of socialization in maintaining social order and cohesion within a given culture or society.
5. Critically analyze the role of gender in socialization processes and its implications for social norms and values.
6. Assess the role of social institutions in shaping and regulating social behavior and interactions within a society.
7. Compare and contrast the concepts of norms and values and their influence on individual and collective behavior in various cultural contexts.
8. Apply the concept of cultural accommodation to analyze how societies adapt and change in response to new ideas, beliefs, and practices.
