POLITICAL THEORY- CONCEPTS AND DEBATES

---

1. Understand the key concepts of political theory, including freedom, equality, justice, and rights, and their significance in governance and society. (Knowledge)

2. Analyze and differentiate between negative freedom (freedom from interference) and positive freedom (freedom to achieve one's potential), and assess their implications for individual autonomy and societal well-being. (Comprehension)

3. Evaluate the principles of equality of welfare, resources, and capabilities, and their impact on promoting social justice and addressing disparities in opportunities and outcomes. (Analysis)

4. Compare and contrast procedural justice (fairness in decision-making processes) and distributive justice (fair distribution of resources and opportunities), and assess their role in ensuring a just and inclusive society. (Analysis)

5. Examine the nature and scope of civil, political, socio-economic, and group rights, and their significance in protecting individual liberties and promoting collective welfare. (Analysis)

6. Critically analyze the debates surrounding human rights, including universality and cultural relativism, and evaluate the implications of these debates for global governance and international relations. (Evaluation)
