

## Sociological Theory

---

### Course Outcome for Sociological Theory:

#### 1. Remembering:

- Recall and explain the Law of Three Stages proposed by Auguste Comte in the development of societies.
- Identify and list the Hierarchy of Sciences as outlined by Comte in his positivist approach to understanding society.

#### 2. Understanding:

- Explain the concepts of Social Statics and Dynamics and analyze how they influence societal structures and changes.
- Demonstrate an understanding of Social Fact as defined by Emile Durkheim and its relevance in studying social phenomena.

#### 3. Applying:

- Apply the concept of Forms of Solidarity to analyze different types of social cohesion within societies.
- Analyze historical events and societal developments using the Materialist Conception of History proposed by Karl Marx.

#### 4. Analyzing:

- Critically evaluate the Forms of Solidarity in different types of societies and their impact on social structures and relationships.

#### 5. Evaluating:

- Assess the strengths and limitations of the Materialist Conception of History in explaining social change and development.

#### 6. Creating:

- Develop a comprehensive analysis of how sociological theories such as the Law of Three Stages and Forms of Solidarity can be applied to contemporary social issues and challenges.
