

## WORLD POLITICS AND GLOBAL POLITICAL ECONOMY (I)

---

1. Remember: Recall key events and concepts related to post-Cold War geopolitics, security of trade routes, globalisation, transnational security issues, and ecological governance.
2. Understand: Explain the significance of global political economy in the context of post-Cold War geopolitics, security of trade routes, globalisation, and ecological governance.
3. Apply: Analyse the impact of globalisation on transnational security issues and evaluate strategies for addressing these challenges.
4. Analyse: Examine the relationship between ecological governance, water management, and environmental policies on a global scale, and their implications for world politics.
5. Evaluate: Critically assess the effectiveness of international cooperation mechanisms in managing global security threats related to trade routes, globalisation, and ecological governance.
6. Create: Develop innovative solutions for promoting sustainable development, enhancing global security, and addressing transnational challenges in world politics and global political economy.
